About Us

With more than 14 years in the Information and Communications Technology (ICT) market, Technosol has been at the forefront of ICT services and IT Consultancy based on the latest technology. We pride ourselves in being a solution's designer and not just a company that offers "one size fits all" products. The company was incorporated in 2000, and operates as a wholly-swazi owned private reporting company.

Technosol prides itself in having longstanding relationships with its clients, some stretching as far back as the company's inception. With customer's networks managed in Europe, the US, Asia and remote parts of Africa, we have proven we are not bound by our locality

Vision

A profitable global business with ICT based solutions:

- To empower businesses and individuals to keep them ahead.
- To be a leader in market share, quality, revenue, growth and gross margins.
- To add value to stakeholders, our investors, customers, partners and associates.
- To build on Swaziland's unique advantages.

Mission

To make a qualitative difference to the lives of millions of people and organizations in Swaziland and across the world by empowering them with the power of information telecommunications technology.

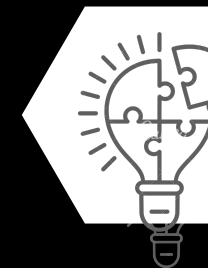

Our Services

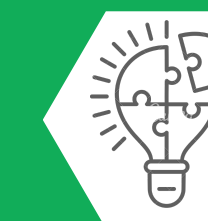

Software Solution Provider

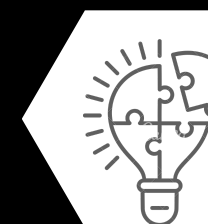

Technosol has immense expertise in architecting complex, state-of-the-art software products.

Software Development & Web Development

Connectivity Services & Networking

Cloud Hosting Services

Domain Registration

A domain name is your website's location on the internet. It translates the digits that make up your IP address into something catchy that people can remember. Domain names are bought through Domain Name Registrars, companies that manage the reservation of domain names and point them to your website

Webhosting

Web hosting is a necessity for any website — it is the physical location of your website on the Internet, an online storage center that houses the information, images, video, and other content that comprises your website. Our Web hosting packages come in a variety of disk space and monthly data transfer sizes.

Consumer services

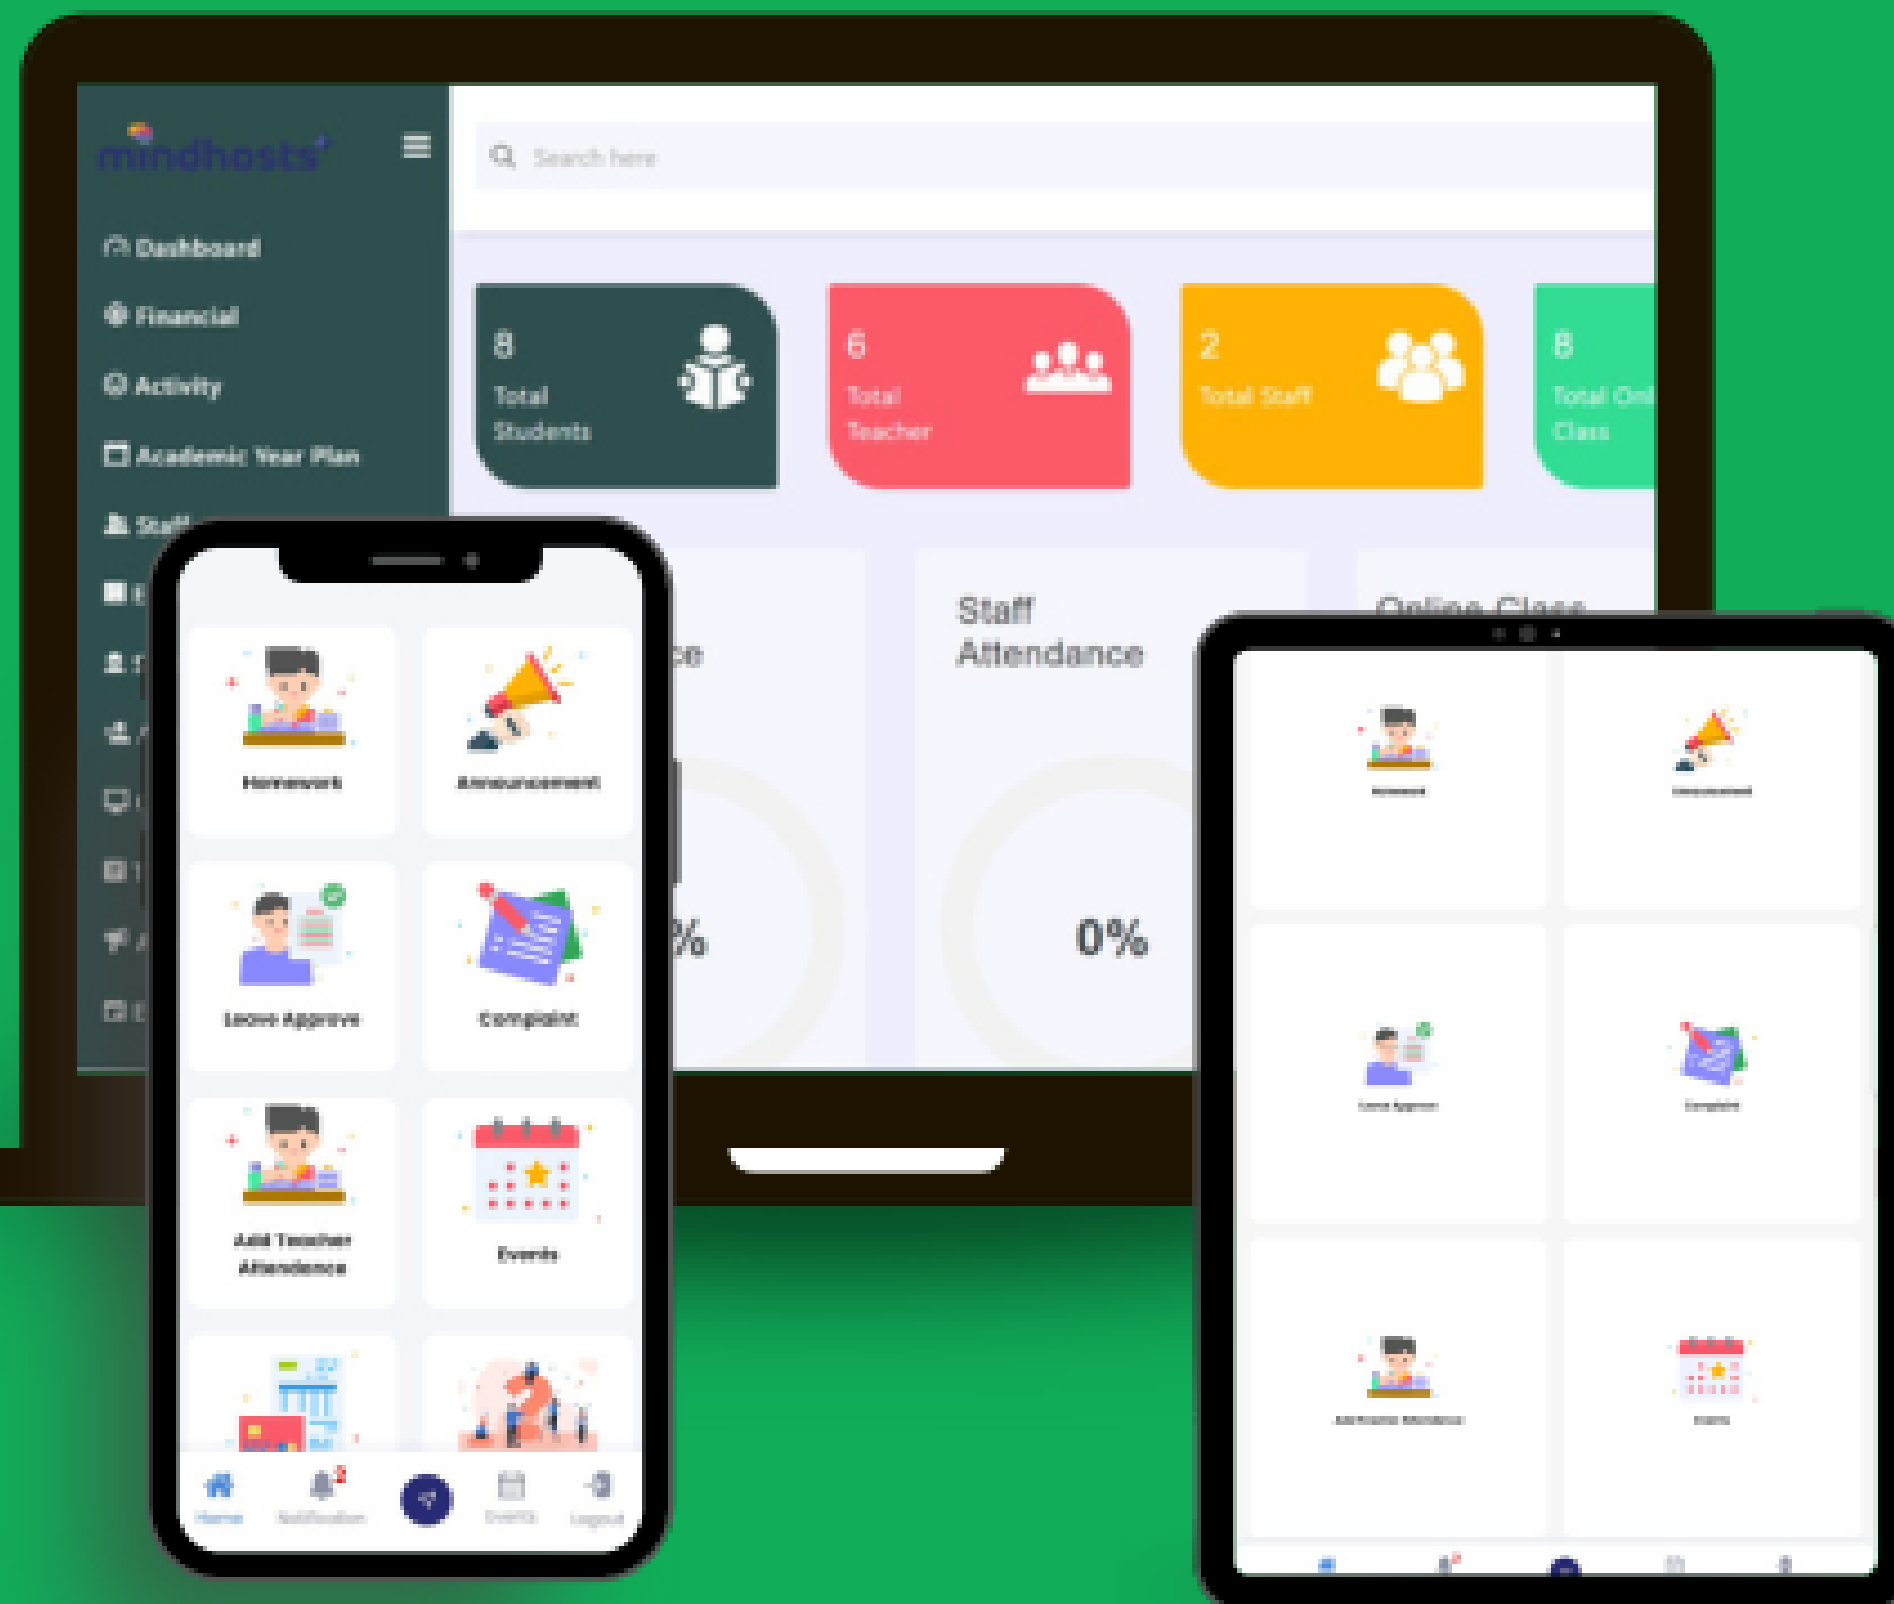

The Online SwaziSMS Portal provides companies with a user-friendly HTTP(web) and SMPP interface for SMS transmission. This service offers an easy-to-use front-end for enterprises looking to access SwaziSMS's high quality network to transmit SMS around the world in a straight forward manner.

E-Commerce

We provide online store and e online payment gate ways APIs

Hardware

Our Products
